Our New Bookstore

Our Expansion Continues

We wish to thank Sara Blamey for doing double duty in Nov. and half of December. As our Sr. Microbiologist, she also held down on a temporary basis the Office Manager position, since Eme Martin left to pursue her MS

Happy New Year! We hope everyone had a great holiday season. We want to thank all of our customers for their past business. Our November seminar was a great success with over 75 in attendance and great speakers. We are currently planning the next seminar for May addressing the Food Marketplace. We welcome topics, as well as, speaker and sponsor referrals. Our mini-round robbin of Mycobacterial testing is launching the week of January 28th, and we have been busy planning this great new year.

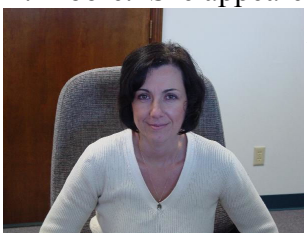
If you have not used our lab services in a while, we have expanded a great deal in our offerings and would like to remind you of some of our services:

Strain Identification and Characterization
Routine and Custom Microbiology (Our Favorite)
Pathogenic Testing
Antimicrobial Challenges
Water and Wastewater Testing
Biofeasibility and Bioremediation Testing
Foreign Object Identification
Microbial Shelf Life Testing
Allergen Testing
Process/Product Development
Biochemical and Enzymatic assays
And Many More

In short, we help you, our Client, by providing excellence in microbiology, service, and expertise coupled with

degree as mentioned in the Nov. newsletter.

Although she supports our cross-training efforts, Sara along with all of us are grateful to welcome our new Office Manager, Candi L. Moore. She appeared just in



time to get us financially organized for the fiscal year end. She even attended the November Seminar!

We also welcome a crop of new interns for the semester. We have instituted a weekly lecture on the microbial world.

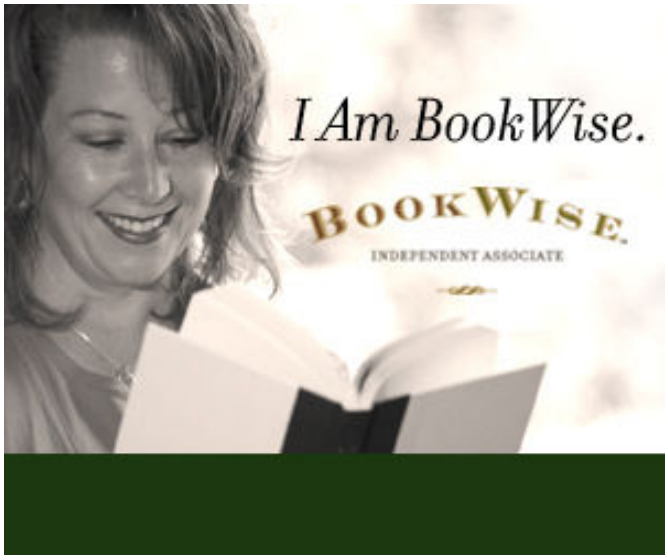
Pictured from left to right are Sandra Brown, Taneasha Davis, Shari Patton, Kiena Williams, and Sarah Meyer.

We wish to re-introduce you to Candi Sullivan, a Senior at Webster Universtiy who has been working with us since last July.

modern instrumentation to help produce new materials, products, or processes and to stand as a resource to resolve biological and biochemical problems in the Food, Nutraceutical, Medical, Environmental, Pharmaceutical and Industrial Markets. You can learn more about us at our website www.microbeinotech.com. We also have a new book website, www.mybookwise.com/microbeinotech , where you can signup as a Preferred Customer. Please let us know if there is something that we can do for you.

Sincerely,

The MiL, Inc.'s Staff (or "is it really, Staph")



Our New On-line Bookstore

We now can provide our clients with significant discounts on some of the greatest books ever written! We have teamed-up with a very enthusiatic network of booksellers. We love to read and know that many of you do as well. This is our way of increasing literacy and knowledge in the world within our reach. Check our site out and become a Preferred Customer with 42% Discounts on books of distinction, music and videos. Read about Dr. Hemming's background and get a little more insight into our CEOs thinking and goals. So in the words of Austin Phelps "Wear the old coat and buy the new book" or as George Herbert counseled " Woe be to him that reads but one book:".

Her Senior project involves bacteriocin production in *Lactobacillus* spp. against *Streptococcus mutans*.

The Professor is Back!

From August through early December, Dr. Hemming acted as an Adjunct Professor in the Biology Department at the University of Missouri --St. Louis. He taught a combined Granduate/Undergraduate course entitled "The Molecular Genetics of Bacteria" Biology 6612/4612 while Dr. Terry Thiel was on sabbatical leave in Spain. The class met for an hour and a half each Monday and Wednesday night throughout the semester. With a total final enrollment of 42 equally split between graduate students and seniors, he reportedly claimed it was a great experience and an excellent time to meet some great students (potential employees or interns!). With a brand new edition of the text used in this course, namely, Larry Snyder and Wendy Champness (authors) Third Edition, "Molecular Genetics of Bacteria", he stated "it was a great opportunity to become updated on genetic advances in this field--I studied hard and expected the students to do the same".

The Graduate Students of UMSL Biology 6612

The Undergraduate Students of UMSL Biology 4612

Exam Time: "I must say I find television very educational. The minute somebody turns it on. I go to the library and read a book." -- Groucho Marks. "Reading is to the mind what exercise is to the body." --Sir Richard Steele "Stretching of the mind can be uncomfortable and small things can make a big difference." --spoken like a true microbiologist, Bruce C. Hemming.
